

The Loretto Hospital

The Loretto Hospital has launched a new FDA-approved clinical trials program! The new clinical trials program is a collaboration with Affinity Health. Together, The Loretto Hospital and Affinity Health will research new effective and safe medical treatments for a host of medical conditions.

Current studies include:

- Sickle Cell Disease
- Crohn's Disease
- Heart Failure
- Ulcerative Colitis
- Pericarditis
- Low Testosterone

If you have been diagnosed with any of these conditions, you may qualify to participate in one of our studies. Qualified participants have access to:

- **Alternative** treatment options for your diagnosis
- **Free** health care over the course of the study
- **Free** transportation to doctor's visits
- **Compensation** for your time

Help us improve the landscape of health and health care on the Greater West Side of Chicago.
